From Brand: Hart Publishing : Climate Change and Displacement: Multidisciplinary Perspectives before purchasing it in order to gauge whether or not it would be worth my time, and all praised Climate Change and Displacement: Multidisciplinary Perspectives:

This book - now available in paperback - brings together a variety of disciplinary perspectives on the phenomenon of

climate-induced displacement. It offers a rigorous holistic analysis of the phenomenon, which will better inform academic understanding and policy development alike. Each chapter identifies key issues that need to be considered in shaping domestic, regional, and international responses, including the complex causes of movement, the conceptualization of migration responses to climate change, the terminology that should be used to describe those who move, and attitudes to migration that may affect decisions to stay or leave.

Jane McAdam's collection of essays with its multidisciplinary approach is a welcome addition to the existing corpus of literature in the area. The contributors are leading experts in the field and their opinions are significant for guiding well-informed policy. *Climate Change and Displacement* should be read by anyone interested in this area. The book provides a good understanding of existing legal regimes and institutions and their limitations. It considers innovative solutions that could be turned into international responses. *Ritumbra Manuvie Climate Law* Volume 2, Number 4, 2011... the book's main strength is its contextualisation and historicisation of migration and environmental change in the Pacific islands. The diversity of perspectives and the disagreements between contributors help to ensure that the book does fulfil its aim of providing 'considered, well-informed research' that does not 'oversimplify the cases of movement' (p. 4). Given the multi-disciplinary nature of this book it will be of relevance to a wide audience of students and scholars of politics, geography, development studies, anthropology, law, psychology and public health. It will also be compelling reading for policy-makers, non-governmental organisations and activists who are seeking to understand the impact of climate change on people. *Nina Hall Environmental Politics* April 2011 McAdam's multidisciplinary collection of essays on climate change and displacement is a welcome addition to a corpus of literature largely dominated by studies on the scientific underpinnings of climate change and on proposed mitigation strategies. The chapters are concise, yet dense and engaging; the topics covered are wide-ranging and build upon one another to provide a fluid read; and finally, it provides a 'one-stop shop' for an overview of the important but still nascent subject of climate-induced displacement. *David Adam Suzenski New Global Studies* Volume 5, Issue 1 *Climate Change and Displacement*... brings together a wide a

About the Author: Jane McAdam is a Professor in the Faculty of Law at the University of New South Wales, a non-resident Senior Fellow at the Brookings Institution, Washington DC, and a Research Associate at the Refugee Studies Centre, University of Oxford.
