**From Gardiner Stephen Caney Simon Jamieson Dale : Climate Ethics: Essential Readings** before purchasing it in order to gage whether or not it would be worth my time, and all praised Climate Ethics: Essential Readings:

0 of 0 people found the following review helpful. This is a great text for an undergraduate course in environmental ethics/philosophy/policyBy E. AndersonThis is a great text for an undergraduate course in environmental ethics/philosophy/policy. Gardiner's, Stern's and Singer's contributions are worth the price of admission.0 of 0 people found the following review helpful. Four StarsBy ERODThis item was fine as described.5 of 6 people found the following review helpful. Essential Reading in the Ethics of Climate Change PolicyBy James AdcockSome of the best

articles on climate change that I have ever read -- and I have "read them all," In particular the clarity and honesty of Henry Shue.

This collection gathers a set of seminal papers from the emerging area of ethics and climate change. Topics covered include human rights, international justice, intergenerational ethics, individual responsibility, climate economics, and the ethics of geoengineering. Climate Ethics is intended to serve as a source book for general reference, and for university courses that include a focus on the human dimensions of climate change. It should be of broad interest to all those concerned with global justice, environmental science and policy, and the future of humanity.

About the Author Simon Caney is Professor in Political Theory and Tutorial Fellow in Politics at Magdalen College, Oxford University. Stephen Gardiner is Associate Professor of Philosophy at University of Washington. Dale Jamieson is Director of Environmental Studies at New York University. Henry Shue is Senior Research Fellow at Centre for International Studies, Oxford University.
