Alliance for Technology Access : Computer Resources for People with Disabilities: A Guide to Assistive Technologies, Tools and Resources for People of All Ages before purchasing it in order to gage whether or not it would be worth my time, and all praised Computer Resources for People with Disabilities: A Guide to Assistive Technologies, Tools and Resources for People of All Ages:

0 of 0 people found the following review helpful. OutdatedBy K. CampThis book is outdated but does have wonderful guides in the back for how to choose the best technology/types for every individual. The checklist will never go out of date even if the products are out of date. Good if you want a beginning knowledge of the various types of assistive technology available.0 of 0 people found the following review helpful. Computer ResourcesBy Bonnie J. H. QuistBack in 2000 I was in an AT class and this was one of our textbooks, needless to say things have changed in the

AT world and I was so happy to find this updated version, I hope that it is upgraded again soon. I realized how full of information it really is. Easy reading not difficult for anyone. 0 of 1 people found the following review helpful. nick 30By Shirley Kappanot what i expected at all. the only thing useful for me were perhaps some of the sources, which i could mostly find online. i have chronic pain, and this book was mainly written for people who are blind, deaf, or missing fingers, etc. i wouldn't recommend it.

Today's technology is redefining human potential. Current computer hardware and software can create new ways for people with any kind of a disability to interact with the world. In this book the Alliance for Technology Access, a coalition of the foremost experts in the country, many of whom experience the disabilities they address, brings together the latest information and straightforward approaches to exploring technology options, including:** Guidance and support in building an assistive technology plan** Worksheets and other tools to help with planning and decision making** Information specific to life situations that impact decisions and direction** How to make use of conventional, assistive, and information technologies** Real-life stories of people with disabilities using technology successfully** A "toolbox" section with 150 pages of information about current specific technologies** 100 pages of Helpful Resources and ReferencesSee Publishing History for a description of specific changes in this 4th edition

"I loved this book for demystifying assistive technology. It makes accessible computers ... accessible!" -- Inside MS (National MS Society), Vol. 23, Issue 3, June-July 2005)
