Arlene G. Fink : Conducting Research Literature Reviews: From the Internet to Paper (Volume 4) before purchasing it in order to gage whether or not it would be worth my time, and all praised Conducting Research Literature Reviews: From the Internet to Paper (Volume 4):

0 of 0 people found the following review helpful. College classBy CGMNeeded for class0 of 0 people found the following review helpful. Five StarsBy Zachary P GoldmanLike the title says, it does a great job of showing how to

conduct a literature review. 1 of 1 people found the following review helpful. Great for graduate school research classes
By Kelli Rice
Very helpful with my research class this semester!! I found the entire book quite useful and believe anyone attempting a literature review assignment would benefit from reading it.

Providing readers with an accessible, in-depth look at how to synthesize research literature, *Conducting Research Literature Reviews* is perfect for students, researchers, marketers, planners, and policymakers who design and manage public and private agencies, conduct research studies, and prepare strategic plans and grant proposals. Bestselling author Arlene Fink shows readers how to explain the need for and significance of research, as well as how to explain a study's findings. Offering a step-by-step approach to conducting literature reviews, the Fourth Edition features updated examples and covers: how to select databases and evaluate their quality; selecting and organizing key words and other terms in order to effectively search databases and the Web; setting standards for evaluating the quality of research and other literature; extracting and recording information from articles and studies; synthesizing what the reader finds either descriptively or via a meta-analysis; recording and storing the results in a virtual file cabinet; and how to use bibliographic software.

This is a great book for students, both for classroom use and to keep on their bookshelves once they graduate.--Gail Spencer
"This book is a textbook with apparatus: opening summaries of the each chapter ("A reader's guide") exercises with suggested answers, and references cited in each chapter. But this book is much more than a how-to for students to learn how to design and write literature reviews. Fink devotes considerably space to the always tricky question of how to evaluate the actual articles you select to review."--Tom Warren
"Journal of the Society for Technical Communication"
"Classed with scientific research handbooks, Fink's work provides examples of designs and analytical concepts from medical, educational, psychosocial, and business domains. She laudably holds qualitative and observational research designs to the same standards of reliability and validity as experimental research."--P.E. Sandstrom
"CHOICE"
"I think this text presents the goals/reasons, thought-process, and practical steps involved in writing literature reviews in a much more logical and approachable (readable) manner than many I have seen." --Julia L. Sloan, Cazenovia College --Julia L. Sloan (06/24/2013)
"The material is an exemplary mix of explication and illustrations of the steps in finding, reviewing, and evaluating the research for a literature review." --Walter J. Ullrich, California State University, Fresno --Walter J. Ullrich (06/24/2013)
"The text provides a thorough and comprehensive overview of the literature review process. I am particularly pleased that the text provides a detailed discussion of how best to choose online databases and provides specific strategies for obtaining optimal search results through the use of Boolean operators." --JaMuir M. Robinson, Walden University--JaMuir M. Robinson (06/24/2013)
"The book is an in depth discussion of the literature review journey, highlighting many issues and pitfalls which could hinder the successful completion. The reader is guided through the journey with realistic advice and an explanation of key terms to ensure a successful search that is productive, fruitful and reliable." --Suzanne Sinclair, University Centre at Blackburn College--Suzanne Sinclair (06/24/2013)

Ullrich, California State University, Fresno (Walter J. Ullrich 2013-06-24)About the AuthorArlene Fink (PhD) is Professor of Medicine and Public Health at the University of California, Los Angeles, and president of the Langley Research Institute. Her main interests include evaluation and survey research and the conduct of research literature reviews as well as the evaluation of their quality. Dr. Fink has conducted scores of evaluation studies in public health, medicine, and education. She is on the faculty of UCLA's Robert Wood Johnson Clinical Scholars Program and is a scientific and evaluation advisor to UCLA's Gambling Studies and IMPACT (Improving Access, Counseling Treatment for Californians with Prostate Cancer) programs. She consults nationally and internationally for agencies such as L'institut de Promotion de la Prvention Secondaire en Addictologie (IPPSA) in Paris, France, and Peninsula Health in Victoria, Australia. Professor Fink has taught and lectured extensively all over the world and is the author of more than 130 peer-reviewed articles and 15 textbooks.
