**From Zone Books : Contemporary States of Emergency: The Politics of Military and Humanitarian Interventions** before purchasing it in order to gage whether or not it would be worth my time, and all praised Contemporary States of Emergency: The Politics of Military and Humanitarian Interventions:

2 of 2 people found the following review helpful. Excellent collection of essaysBy Jennifer EdwardsI think this book is well worth reading for anyone interested in human rights or humanitarian response. I highly recommend it.3 of 3 people found the following review helpful. Why does this book not get more reviews?By Buyer anoymousThe subject

is at the heart of the issue of globalisation, philanthropy and development. We have seen how interest motivated the Iraq war was, how about Darfour, Somalia or again North Korea. The publications trying to lift the debate about humanitarian interventions on the agenda are numerous. If you are interested in the subject matter you should read this one and the others as listed hereafter... U.N. a Cosa Nostra: The workings of an organization 'helping' the poorest of the world (Volume 1) War Games: The Story of Aid and War in Modern Times 1 of 1 people found the following review helpful. Eye opening By Marcela The book is a must have in any emergency manager / humanitarian's library. The concepts explained give a wider view of the world.

The new form of "humanitarian government" emerging from natural disasters and military occupations that reduces people to mere lives to be rescued. From natural disaster areas to zones of political conflict around the world, a new logic of intervention combines military action and humanitarian aid, conflates moral imperatives and political arguments, and confuses the concepts of legitimacy and legality. The mandate to protect human lives -- however and wherever endangered -- has given rise to a new form of humanitarian government that moves from one crisis to the next, applying the same battery of technical expertise (from military logistics to epidemiological risk management to the latest social scientific tools for "good governance") and reducing people with particular histories and hopes to mere lives to be rescued. This book explores these contemporary states of emergency. Drawing on the critical insights of anthropologists, legal scholars, political scientists, and practitioners from the field, *Contemporary States of Emergency* examines historical antecedents as well as the moral, juridical, ideological, and economic conditions that have made military and humanitarian interventions common today. It addresses the practical process of intervention in global situations on five continents, describing both differences and similarities, and examines the moral and political consequences of these generalized states of emergency and the new form of government associated with them.

*Contemporary States of Emergency* demands that we rethink the very nature of violence, benevolence, and vulnerability in the face of what Paula Vasquez Lezama felicitously calls 'compassionate militarization. (Gil Anidjar, author of *Semites: Race, Religion, Literature*) About the Author Didier Fassin is James Wolfensohn Professor of Social Science at the Institute for Advanced Study in Princeton, New Jersey, and Director of Studies in Anthropology at the cole des hautes tudes en sciences sociales. His recent publications include *When Bodies Remember: Experience and Politics of AIDS in South Africa*.
