which I really appreciated it. Overall small but very thoughtful and useful book.

This book analyzes widespread global ethnic conflicts that tear asunder nations and regions, such as the former Yugoslavia. Dan Chirots analysis is in a discussion of the conflict between national and ethnic identity, discovering that ethnic identity, rooted in centuries of tradition and habit, often trumps national identity, which may be of more recent gestation and have a weaker hold on people. His analysis affords insights into the recent aggressive U.S. posture on nation building, showing the blindness of this approach to deeply-entrenched ethnic identities. His timely book can be used in classes on globalization, international development, political sociology, social movements, and theory. The goal of this new, unique Series is to offer readable, teachable "thinking frames" on todays social problems and social issues by leading scholars, all in short 60 page or shorter formats, and available for view on <http://routledge.customgateway.com/routledge-social-issues.html> For instructors teaching a wide range of courses in the social sciences, the Routledge Social Issues Collection now offers the best of both worlds: originally written short texts that provide "overviews" to important social issues as well as teachable excerpts from larger works previously published by Routledge and other presses.

About the Author Daniel Chirots is Job and Gertrud Tamaki Professor of International Studies at the University of Washington, Seattle. His books have been about genocide, ethnic conflicts, tyranny, social change, and Eastern Europe. He has consulted for NGOs, most recently for CARE in Africa. He has received a John Simon Guggenheim Fellowship and a Senior Fellowship at the United States Institute of Peace.
