Leads to an increased understanding of the nature of crimes and the individuals who commit them

"A very useful guide for any professional involved in the investigation or litigation of major felonies. Classification of the elements of crime will facilitate the conduct of criminal investigations and resolution of cases." (Richard L. Goldberg, M.D., Georgetown University Hospital) "The very first book by and for criminal justice professionals in the major case fields . . . The skills, techniques, and proactive approaches offered are creatively concrete and worthy of replication across the country. . . Heartily recommended for those working in the 'front line' of major case investigation." (John B. Rabun, Jr., ACSW, vice president and chief operating officer, National Center for Missing and Exploited Children) Praise for the First Edition "A very useful guide for any professional involved in the investigation or litigation of major felonies. Classification of the elements of crime will facilitate the conduct of criminal investigations and resolution of cases." Richard L. Goldberg, M.D., Georgetown University Hospital "The very first book by and for criminal justice professionals in the major case fields. . . Heartily recommended for those working in the front line of major case investigation." John B. Rabun Jr., ACSW, vice president and chief operating officer, National Center for Missing and Exploited Children From the Inside Flap This landmark book standardizes for the first time the language and terminology used throughout the criminal justice system. It classifies the critical characteristics of the perpetrators and victims of the three major violent crimes: murder, arson, and sexual assault based upon the motivation of the offender. Based on the primary intent of the criminal, the Crime Classification Manual leads to an increased understanding of the nature of crime and the individuals who commit such crimes. This is an indispensable reference for anyone whose work brings them into contact with either the offender or victim of violent crime. A decade in development, this work forms the basis of contemporary investigative "profiling," the highly acclaimed strategy in which crimes are solved by generating a "profile" of the suspect. The manual provides law enforcement and mental health professionals access to the same information used by the F.B.I. to coordinate their investigations. Also available is the Pocket Guide to the Crime Classification Manual, which presents in handy outline form the data in the main volume and serves as a quick in-the-field reference tool.
