Jane F. Gaultney, Hannah D. (duBreuil) Peach : How To Do Research: 15 Labs for the Social Behavioral Sciences before purchasing it in order to gage whether or not it would be worth my time, and all praised How To Do Research: 15 Labs for the Social Behavioral Sciences:

Designed to help students make the leap from learning about research to doing research, How To Do Research by Jane F. Gaultney and Hannah D. Peach provides an easy-to-understand walkthrough of the entire research process, from selecting a topic and conducting a literature review through presenting an APA-style paper or presentation. All of the 15 cross-disciplinary labs included are appropriate for use in the social, behavioral, and health sciences, and follow a consistent format: objective, description of a journal article, canned data, examples of what output should look like, pointers on interpreting the output, and a suggested activity for those who wish to collect their own data.

About the Author Dr. Jane Gaultney is professor of Psychology and a faculty member of the Health Psychology PhD Program at the University of North Carolina at Charlotte. She has taught Research Methods for many years (never mind exactly how many), and uses the labs in this manual as teaching tools on a regular basis. She received a PhD in Psychology from Florida Atlantic University. Her current research program looks at sleep and its association with cognitive, behavioral, and health outcomes.
