By Dragon Fire As a self defense instructor with over 25 years of experience, I gave this book a four star rating because it covers topics that most people are oblivious to let alone are trained and prepared for. However, with that being said, you have only scratched the surface of becoming an aware and responsible defender. Most people in a home defense/active shooter scenario would jump from unaware to panic. This is great for both, stimulating the minds of those just starting the journey to becoming a warrior as well as a stimulus for those seasoned warriors out there who need to "sharpen the saw". You should publish a follow up. Great job! 2 of 3 people found the following review helpful. If you understand statistics read "How to Survive a Hippopotamus Attack" first. By USAFA 90 Excellent book, but I am busy reading the book called "How to Survive a Hippopotamus Attack" as it is 20 times statistically more likely to occur. 0 of 0 people found the following review helpful. One Star By Lesli H Very basic information. Poorly written.
