EstrinThis book is filled with so much useful information on all of the ins and outs of writing a master's thesis that I cannot imagine how anyone could write without it. It answers all of the questions you did not even know you had about search engines and exactly how each chapter has to be structured and how to put all of the chapters together. I am just in the beginning stages of writing my thesis but I am certainly glad that I have this book as my companion on the journey.0 of 0 people
