Action ResearchBy SweetladysuttonThis text relays authoritative content, a time-tested step-by-step approach, and abundant use of research examples. With improved clarity and readability, this edition strengthens its focus on evidence-based practice to better demonstrate how the steps of the research process relate to evidence-based nursing. In addition, the text offers unique insights into understanding, appraising, and applying published research to evidence-based practice.0 of 0 people found the following review helpful. SchoolBy

MickeyHard to find locally and when you do the price is much higher. So instead of running around town she will buy them online.

This compact, clear and user-friendly text provides everything a pre-service or in-service teacher needs to know to follow the research cycle and conduct an action research project. This text emphasizes reflective processes used in planning and conducting action research studies, data analysis techniques (quantitative and qualitative), and displaying and explaining results. It provides specific information needed to complete each step of the action research cycle with chapter activities that help the student/reader conduct projects focused on school improvement. Each activity includes a research paper component that helps students create a research paper as they complete the activities in each chapter. This text has more emphasis on reflective and reflexive activities than other text and is geared toward adults/professionals who will use these activities to conduct action research for educational change and school improvement.
