Inequality After the 20th Century: Papers from the Sixth Ecineq Meeting (Research on Economic Inequality):

The essays in this series offer fresh theoretical and methodological insights into the key issues in the field of economic inequality. The content is comprised of highly topical subject matter with key researchers in the field contributing.

Editors Bishop and Rodriguez present readers with a collection of papers selected from research presented at the sixth ECINEQ meeting, held in Luxembourg in 2015. The selections that make up the main body of the text are devoted to reference groups and the poverty line; the vulnerable and the poor; the effects of reducing inequality in household education, health, and access to credit on pro-poor growth, and other related subjects. John A. Bishop is a faculty member of East Carolina University in North Carolina. Juan Gabriel Rodriguez is a faculty member of the Universidad Complutense de Madrid in Spain.
