Nigel King, Christine Horrocks : Interviews in Qualitative Research before purchasing it in order to gauge whether or not it would be worth my time, and all praised Interviews in Qualitative Research:

2 of 2 people found the following review helpful. Five Stars By William Riddel Excellent all the way around. I would buy from them again. Very satisfied overall.

Interviewing is used very widely in qualitative research, and takes many different forms. It is also a method that is constantly evolving, in response both to theoretical and technological developments. The authors present a clear and thorough guide to the use of interviews in contemporary qualitative research. The book also features a chapter which

introduces the principles and practice of the thematic analysis of interview data, and the book concludes with a detailed consideration of the use of interviews in two major qualitative research traditions: phenomenological and narrative approaches.

[The authors] provide a functional discussion of multiple topics related to interviewing in their book...However, [they] present more than just a useful discussion of how to design, conduct, and analyze interviews. They simultaneously introduce the importance of philosophical approaches and ethics in relation to the topics discussed, making connections between the important notions and the qualitative research process they describe. Their practical approach to the topics presented makes their book a wonderful resource for novice researchers. The Weekly Qualitative Report All novice researchers require guidance for delivering different interviewing techniques and this book provides just that with plenty of practical advice....The book is written in a clear and understandable style, which even applies to the chapter on phenomenology!...this text is worthwhile investing in as a reference book for anyone planning to use qualitative interviewing. Social Research Association News [The authors] provide a functional discussion of multiple topics related to interviewing in their book...However, [they] present more than just a useful discussion of how to design, conduct, and analyze interviews. Social Research Association News About the Author Nigel King is Professor in Applied Psychology and Director of the Centre for Applied Psychological Research at the University of Huddersfield, UK. He has a long standing interest in the use of qualitative methods in real world research. With a background in both organizational and health psychology, his research interests include professional identities and interprofessional relations in health and social care. He is author with Christine Horrocks of *Interviews in Qualitative Research* (Sage, 2010) and with Neil Anderson of *Managing Innovation and Change: A Critical Guide for Organizations* (Thomson Learning, 2002). Nigel is well-known for his work on Template Analysis and, more recently, the development of a visual interview technique known as Pictor.
