following review helpful. and how we can do better in meeting their needsBy R. EvansWhen I came across this book, I expected another study laden with numbers and formulas. What I found instead was a passionate analysis of why these children matter, and how we can do better in meeting their needs. What lies inside this book is as eloquent and moving as its cover. I recommend it without hesitation.

Maya Ajmera and Greg Fields provide the architecture of a new perspective on the global agenda for children, based on a new global web of relationships stemming from the community level. Arguing that the existing global agenda for children has failed, this book reimagines how society can support the worlds most vulnerable children. In doing so, Invisible Children identifies and gives voice to the millions of children globally living on societys margins, while showing a way forward as to how we can best invest in children.

From the Back Cover'This masterful volume is remarkable in its scope and depth. It calls attention to the countless children globally who are exposed to poverty and other adversities. Emphasizing the shortcomings of many traditional efforts and recommending innovative grass-roots approaches that promise high impact, it offers excellent guidance for anyone involved in foreign assistance or international development.' Jo Boyden, University of Oxford, UK Invisible Children provides a passionate, comprehensive and well-researched overview of community-based organizations and the vital contribution they make toward the wellbeing of the most vulnerable children globally. This book is a valuable contribution to any international development course. -Peter Laugharn, The Hilton Foundation, USAMaya Ajmera and Greg Fields provide the architecture of a new perspective on the global agenda for children, based on a new global web of relationships stemming from the community level. Arguing that the existing global agenda for children has failed, this book reimagines how society can support the worlds most vulnerable children. In doing so, Invisible Children identifies and gives voice to the millions of children globally living on societys margins, while showing a way forward as to how we can best invest in children. About the AuthorMaya Ajmera is currently President and CEO of the Society for Science the Public, and Publisher of Science News. She is a professorial lecturer at the Paul H. Nitze School for Advanced International Studies at Johns Hopkins University, USA, and a Henry Crown Fellow at the Aspen Institute. She founded and led for 18 years The Global Fund for Children that invests in innovative community based organizations serving the most vulnerable young people in the world. Gregory A. Fields worked with Maya Ajmera at the Global Fund for Children, emphasizing fund raising, strategic planning and external relations. Subsequent to his time at GFC, he founded an international development consultancy, and is now a professional writer and editor.
