Now in a new edition, *Iron Cages* provides a unique comparative analysis of white American attitudes toward Asians, blacks, Mexicans, and Native Americans in the 19th century. This pathbreaking work offers a cohesive study of the foundations of race and culture in America. In a new epilogue, Takaki argues that the social health of the United States rests largely on the ability of Americans of all races and cultures to build on an established and positive legacy of cross-cultural cooperation and understanding in the coming 21st century. Observing that by 2050 all Americans will be minorities, Takaki urges us to ask ourselves: Will America fulfill the promise of equality or will America retreat into its "iron cages" and resist diversity, allowing racial conflicts to divide and possibly even destroy America as a nation? Incisive and provocative, *Iron Cages* is an essential resource for students of ethnic history and important reading for anyone interested in the history of race relations in America.

"Suitable for surveys and advanced courses in Ethnic and social history, this book has important revelations for our 21st century students. It tells of paths taken and abandoned, lessons learned and ignored, and consequences. A thought provoker."--Stuart Knee, College of Charleston
