Michael Moss, Barbara Endicott-Popovsky, Marc J. Dupuis : **Is Digital Different?: How Information Creation, Capture, Preservation and Discovery are Being Transformed** before purchasing it in order to gage whether or not it would be worth my time, and all praised Is Digital Different?: How Information Creation, Capture, Preservation and

Discovery are Being Transformed:

This landmark edited collection brings together global experts on the impact of new technology on information services. Covering a range of key topics around discovery and preservation, this book explores the role of information professionals in a rapidly changing digital landscape that is challenging the very existence of the traditional library. Focusing on the issues surrounding the transition from an analog to a digital environment, contributors examine whether analog practices and procedures are still valid and if they shape or distort those in the digital realm. The digital environment has the potential to transform scholarship and break down barriers between academia and the wider community through social networks and crowd sourcing, and this thought-provoking collection draws out both the inherent challenges and the opportunities.

"It is meant to serve as a textbook, but could certainly be useful to practitioners, especially those who need to educate or update themselves in this arena. The technological jargon is generally well defined and explained clearly for the layman. This is a useful compilation of many of the important considerations of how to manage digital content in the present environment." --*Technical Services Quarterly*

About the Author: Michael Moss is professor of archival science at the University of Northumbria, UK. Previously, he was research professor in archival studies in the Humanities Advanced Technology and Information Institute at the University of Glasgow, where he directed the Information Management and Preservation MSc program. He is a non-executive director of the National Records of Scotland and until 2014 a member of the Lord Chancellor's Advisory Council on National Archives and Records. In 2015 he was Miegunyah distinguished fellow at the University of Melbourne. Barbara Endicott-Popovsky, Ph.D., is Executive Director of the Center for Information Assurance and Cybersecurity at the University of Washington, Director of the Master of Cybersecurity and Leadership program, Academic Director for the Masters in Infrastructure Planning and Management in the Urban Planning Department of the School of Built Environments and was named Department Fellow at Aberystwyth University Wales, UK (2012). Marc J. Dupuis, Ph.D., is a researcher and lecturer with the University of Washington as well as the Director of Human Factors for the Center for Information Assurance and Cybersecurity (CIAC). His main focus is on understanding the information security behavior of individuals, including issues related to decision making and the user experience.
