John Lechte : Key Contemporary Concepts: From Abjection to Zenos Paradox (Theory, Culture Society (Paperback)) before purchasing it in order to gage whether or not it would be worth my time, and all praised Key Contemporary Concepts: From Abjection to Zenos Paradox (Theory, Culture Society (Paperback)):

A book which all students of the human sciences will find useful, both for its range of engagements and its pedagogic ambitions. To be read and to be enjoyed - Nigel Thrift, University of Bristol This book is the essential roadmap to the key concepts which frame our understanding of society and culture. From cybernetics to quantum theory, from ideology to power, from aesthetics to mimesis, this book spans a range of disciplines to provide an insight into the current scientific and intellectual state of society. Written by the author of the international bestseller *Fifty Key Contemporary Thinkers* (Routledge, 1994) this ambitious pedagogical and intellectual project dazzles with insight and the breadth of knowledge presented. Each entry provides a history and current meaning of the concept in question. It then outlines its place in the work of a key author, while also offering an interpretation of the terms significance, both current and classical. Concepts are organized in alphabetical order, complete with references for further research, making this the essential reference for students throughout the social sciences and humanities.

'A book which all students of the human sciences will find useful, both for its range of engagements and its pedagogic ambitions. To be read and to be enjoyed' A book which all students of the human sciences will find useful, both for its range of engagements and its pedagogic ambitions. The book is best thought of as a cabinet full of the theoretical curiosities of the modern age, able to be dipped in to and out of at will. And, like a cabinet of curiosities, it is not just a repository of knowledge but, also, in the very best sense, an entertainment. To be read and to be enjoyed.' Nigel Thrift, University of Bristol A book which all students of the human sciences will find useful, both for its range of engagements and its pedagogic ambitions. The book is best thought of as a cabinet full of the theoretical curiosities of the modern age, able to be dipped in to and out of at will. And, like a cabinet of curiosities, it is not just a repository of knowledge but, also, in the very best sense, an entertainment. To be read and to be enjoyed. Nigel Thrift, University of Bristol About the Author John Lechte is Professor in Sociology at Macquarie University, where he has responsibility for Graduate teaching and research. He has written widely on European philosophy and the image, including the work of Julia Kristeva and Georges Bataille. He has just published a key work on the image, *Genealogy and Ontology of the Western Image and its Digital Future* (2012), and is currently working on the human and the image. With Saul Newman, he will publish, in 2013, *Agamben and the Politics of Human Rights: Statelessness, Images, Violence*.
