Unfortunately, bought several from this author... all about prepping, family survival, first aid, etc.1) the books are poorly written with tons of grammatical and syntax errors. 2) the books repeat over over without making much of a point! 3) for this price, i was expecting more content and pages. But it is a very thin book - in which the author repeats themselves. If they did not, the book would literally be 25 pages!After reading this book, i know very little more about prepping than i did before reading this book. This book was a joke.I did buy a book about prepping (since then) by Jim Cobb. I would recommend books by Jim Cobb, before this 'kids book' by Macenzie Guiver for sure!2 of 2 people found the following review helpful.
