**Jacqueline Aldridge, Andrew M Derrington : The Research Funding Toolkit: How to Plan and Write Successful Grant Applications** before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Research Funding Toolkit: How to Plan and Write Successful Grant Applications:

The Research Funding Toolkit provides this knowledge and offers a range of practical techniques to help you succeed in tough research funding competitions. A complex set of factors determine whether research projects win grants. This

handbook helps you navigate these issues and identify your personal challenges to research grant success.

'This comprehensive book tackles one of the main issues an academic faces today - how to secure funding for research. With Research Council success rates falling and funding in general becoming more competitive this is a book postgraduate students, researchers and the professionals supporting them cannot do without.' - "Dr Louise Bright, University of Glamorgan 'The authors of The Research Funding Toolkit, guide the reader through constructing a grant application step by step, and succeed in providing a very useful tool for success in the research world. Although writing an application is often a daunting and dreaded task, this book is neither boring nor uninspiring: every page is clear and enjoyable, and includes a broad range of examples included from across many disciplines. Thirty-six examples are extracted from eight actual funded applications, covering a diverse selection of funding agencies in several countries. This book is a must-have for every researcher, whether junior or senior, and should be required reading for every member of a department. This book will allow readers to organize a workshop with research groups, with easy to follow steps exercises that Aldridge and Derrington suggest. The result will surely be an interesting and much-improved research proposal that will have high chances of obtaining that next grant'--Simone Belli

(07/04/2013) This comprehensive book tackles one of the main issues an academic faces today - how to secure funding for research. With Research Council success rates falling and funding in general becoming more competitive this is a book postgraduate students, researchers and the professionals supporting them cannot do without Dr Louise Bright University of Glamorgan I'd certainly have no hesitation in recommending this book to researchers who want to improve their chances of getting funding, and also to new and to experienced research managers. In particular, academics who don't have regular access to research managers (or similar) and to experienced grant getters and givers at their own institution should consider this book essential reading if they entertain serious ambitions about obtaining research funding. Adam Golberg Social Science Research Funding 'The authors of The Research Funding Toolkit, guide the reader through constructing a grant application step by step, and succeed in providing a very useful tool for success in the research world.
