Very dry and academic. Used for sociology class but continue to use it for other classes.

By Bethany Swezene
I love reading Berger. Even if I don't always agree with him, his conclusions are typically interesting and well formed. I was glad to have a chance to read him for a course.

This absorbing and original examination brilliantly argues that religion is a product of the society from which it springs--that it is the "sacred canopy" which every human society builds over its world to give it meaning. In this book, Berger expands on theories of knowledge that he first explored (with Thomas Luckmann) in *The Social Construction of Reality*. With illustrations drawn from a variety of primitive, ancient, and contemporary religions.

From the Publisher
This important contribution to the sociology of religion provides an analysis that clarifies the often ironic interaction between religion and society. Berger is noted for his concise and lucid style.
