Hemmingway I purchased the hard copy, the eBook and the audiobook of this; have listened and read it cover to cover and am using the information gleaned from within to improve my residence into an

urban homestead and a bug-in location. I am also using the information within to get ready to find and develop a bug-out location or two. I live in one of the five largest cities in Kansas and know that it won't be where I want to wait out any apocalypse. I am looking to build a neighborhood Mutual Assistance Group and will work with them to see to the preparations for our eventual relocation when the Zombies (those who haven't taken any preparations) come seeking our supplies. Also if it is a grid down collapse you don't want to remain in an area that relies on the Electric Grid for all power. When the juice goes away the pumps for the waste sewer quit working and that creates a whole different set of reasons to bug out. So getting yourself and family ready by following these steps you can be ready to bug in or bug out depending on the situation. 1 of 1 people found the following review helpful. Thank you!!
