Christophe Bonneuil, Jean-Baptiste Fressoz : The Shock of the Anthropocene: The Earth, History and Us before purchasing it in order to gage whether or not it would be worth my time, and all praised The Shock of the Anthropocene: The Earth, History and Us:

Dissecting the new theoretical buzzword of the Anthropocene
The Earth has entered a new epoch: the Anthropocene. What we are facing is not only an environmental crisis, but a geological revolution of human origin. In two centuries, our planet has tipped into a state unknown for millions of years. How did we get to this point? Refuting the convenient view of a human species that upset the Earth system, unaware of what it was doing, this book proposes the first critical history of the Anthropocene, shaking up many accepted ideas: about our supposedly recent environmental awareness, about previous challenges to industrialism, about the manufacture of ignorance and consumerism, about so-called energy transitions, as well as about the role of the military in environmental destruction. In a dialogue between science and history, *The Shock of the Anthropocene* dissects a new theoretical buzzword and explores paths for living and acting politically in this rapidly developing geological epoch.
