1 of 1 people found the following review helpful. Social Gerontology book By julsluvs2read If you are taking a course in Social Gerontology then this may be your textbook. It could also be a useful resource for someone whose not assigned it as a required text. It has lots of great graphs and statistics that are useful in writing research papers. 0 of 0 people found the following review helpful. Using a sociological perspective, book book examines how aging is a social construct, rather than a specific chronological age or set of conditions. KEYTOPICS: Covers all facets of aging, and how aging is a consequence of

various socialstructural factors, rather than a cause.

From the Back CoverThis book explores the contextual dimension of growing old in American society today. It constructs a relationship between the process of aging, its societal definitions and their consequences, and thus a sociology of aging.About the AuthorDuane Matcha is Professor of Sociology at Siena College in Loudonville, New York.
