reading excellent research.

This reader gives a fascinating behind-the-scenes look at groundbreaking research showing students what the process was really like and how the outcome differed from the researcher's expectations. For the first time, students receive a first-hand perspective from the researchers themselves. The reader, organized by type of methodology, offers commentary about varying research approaches, research design, the process of measurement, and the concepts of reliability and validity. This reader is ideal for use with Maxfield/Babbie's RESEARCH METHODS IN CRIMINAL JUSTICE or Weisburd's STATISTICS IN CRIMINAL JUSTICE.
