J. Donald Hughes : What is Environmental History? (What is History?) before purchasing it in order to gage whether or not it would be worth my time, and all praised What is Environmental History? (What is History?):

What is environmental history? It is a kind of history that seeks understanding of human beings as they have lived, worked, and thought in relationship to the rest of nature through the changes brought by time. In this new edition of his seminal student textbook, J. Donald Hughes provides a masterful overview of the thinkers, topics, and perspectives

that have come to constitute the exciting discipline that is environmental history. He does so on a global scale, drawing together disparate trends from a rich variety of countries into a unified whole, illuminating trends and key themes in the process. Those already familiar with the discipline will find themselves invited to think about the subject in a new way. This new edition has been updated to reflect recent developments, trends, and new work in environmental history, as well as a brand new note on its possible future. Students and scholars new to environmental history will find the book both an indispensable guide and a rich source of inspiration for future work.

"Anyone seeking help in navigating the shifting shoals of environmental history will give fulsome thanks to Don Hughes for this book. It is far and away the best guide yet to the issues and historiography of this emerging field, spanning the globe and delving into the deep as well as recent past." J. R. McNeill, Georgetown University

"What is Environmental History? is a masterfully condensed overview of one of the most urgent and rapidly developing fields of history. Written by a scholar of classical antiquity, it gracefully covers ancient, medieval, and modern periods with a global vision. A state-of-the-art report for any scholar, and a perfect introduction for the student." Sverker Srin, Royal Institute of Technology, Stockholm
