Joe Nobody : Without Rule of Law: Advanced Skills to Help You Survive before purchasing it in order to gage whether or not it would be worth my time, and all praised Without Rule of Law: Advanced Skills to Help You Survive:

6 of 7 people found the following review helpful. definitely not "advanced" skillsBy CustomerFor the price, I expected much more comprehensive content than what is offered. There is a heavy emphasis on what amounts to burglary methods and tools, and very little else. The few tactics techniques and procedures offered are very basic, like a simplified offering of what's taught during military basic training. I question the authors credentials and expertise on this subject matter. 0 of 0 people found the following review helpful. Cool read and a good back up manualBy Bowtech ericSo far as ive just started to read it it is incredibly insightful. Can't wait to finish this good book!!!!3 of 4 people found the following review helpful. Very basic, just not worth the money. By PsychoGradThis is a very basic book. As in, if you rolled off the couch and walked into an apocalypse, come Day 2 (if you're still alive), you already know more than the book. A lot of what it says is stuff that you can easily think of without having to have someone

tell you. One of the best ways to look unimposing in an urban setting is to look homeless (duh). Blend in by looking like the populace (oh really?). I don't know quite what I was expecting when I bought this (maybe more along the lines of long-term survival in an urban environment), but this book greatly underdelivered. I guess, if I still had this book, I would use it as a catalyst for further discussion in a group. How we would implement and further develop the talking points. Overall, I'd say spend the money towards a more developed book.

WARNING: This book contains material that may be offensive to some readers. It is an instructional guide covering tactical actions and capabilities which should only be executed in last-resort survival situations. This book was written for non-military readers who believe in self-reliance and wish to develop advanced, just-in-case capabilities for themselves and their families. It leads the reader through progressively more complex preparations and activities. Written by Joe Nobody, author of the bestselling *HOLDING YOUR GROUND* series of books, this work addresses skills that may be necessary to survive if a breakdown of society or government should occur. The work covers topics such as camouflage, breaching, hiding, stalking, looting, scavenging, infiltration and disguise. The book includes numerous examples, special equipment, exercises and instructional text on how to plan, equip and execute these actions in a potentially hostile, post-SHTF environment. It takes the reader through various scenarios and provides guidance should TEOTWAWKI occur and extreme measures are required to survive.

This book may tick some people off...how to do things that some might find immoral...interesting stuff, things I hadn't thought of before. How to hide. How to evade. How to infiltrate. How to scavenge... if all of your preps have been expended or destroyed, there are skills you can deploy to increase your chances of living. - SHTFBLOG.com If you are serious about survival, this book is a Must Read...Paratus Familia Blog This guy knows his stuff. And this book could save your life many times over. Perhaps even make you a post-apoc ninja...James M. Dakin Blog Oh, and yes buy this book if you haven't already. I am very pleased with the information provided...rationalsurvivor.com Some pretty good stuff here. I got it on the kindle and it is thorough in its approach to SERE for a prepper...onpointtactical.com From the Author I didn't want to write this book. It goes against my grain. I am a positive, optimistic person, and the subject matter of this work is dark and foreboding. It speaks of a time when my meticulous preparations fail, and I have to resort to the very behavior that I have campaigned to eradicate. It advocates and teaches skills and actions that I despise in others. Yet, the very creed of self-reliance is preparing---for whatever may happen. Are we so confident that the proverbial S will HTF only one time? Where is it written that society will immediately bounce back, returning civilization quickly to its pre-SHTF state? Is there no such thing as TEOTWAWKI II? What happens when my preparations are not enough? Our forefathers possessed skills that we respect, in which they lived valuable lives without the advantages of electricity and other modern conveniences. Despite all of their self-reliance, skills, and knowledge, disaster still struck. Drought, Indian raids, war, and even weather that destroyed crops endangered their lives. They often struggled to survive, despite all of their preparations. In a post-SHTF society, there will likely be no resources for an already starving population if disaster strikes - again. Without Rule of Law assumes that such a time arrives when anarchy is pervasive, and the remnants of humanity are struggling to re-establish civilization. Governmental resources are thin or nonexistent. Do you have a plan for this contingency? What additional skills or means would you need on hand to prepare for this? I hope this work helps in your preparations and generates a thought process allowing you to address this threat.
