One of the better books I've read on this subject.By Virginia BurzottaI've worked with people with severe behavior challenges for 20 years and found this book gave some solid instruction for my staff.3 of 3 people found the following review helpful. Practical AdviceBy J. GrosserThis book is loaded with practical advice for common problems that Behavior Analysts experience during the implementation phase of a behavior plan. Reading this book would also be helpful for anyone implementing a plan with staff (that is, behavior plan or even policies).

The effectiveness of support plans for reducing challenging behavior among people with severe disabilities is heavily dependent on how those plans are carried out by direct service staff. This book describes a step-by-step approach for

ensuring support plans are carried out appropriately. Relying on their 50 years of combined work experience and over 100 published articles in developmental disabilities, the authors provide tried and tested strategies for promoting successful implementation of behavior support plans by front-line staff. Chapter contents include an outcome management approach for working with staff to ensure follow through with behavior support plans, obtaining management backing for working with staff to carry out support plans, essential components of support plans, effectively training staff in support plan procedures, monitoring program implementation in a manner acceptable to staff, maintaining program proficiency of staff, and correcting problems with program implementation.

"A good job of hitting topics service folks really need to pay attention to if concerned about implementing behavior supports" -- Dr. David Rotholz, SC Center for Disability Resources  
"The authors have many years of experience and their experience shows in the real world focus of this excellent book" -- AL Association for Behavior Analysis, January 2003 Quarterly Newsletter  
"Very informative and thorough, addresses issues often overlooked by clinicians in congregate settings, very specific and useful tools" -- Dr. Bridget Shore, Florida Institute of Neurologic Rehabilitation
