Today's tech-savvy and digitally connected students present a new challenge for today's school librarians. This book offers the 21st-century tools and know-how necessary for educators to appeal to and challenge students to learn and to want to learn. Includes innovative, practical lesson plans designed to promote problem solving skills, flexible thinking, and metacognition as well as an extensive bibliography of additional resources. Addresses how to analyze quantitative and qualitative data to perform the assessment necessary to improve learning outcomes. Provides essential information and guidance for K12 librarians, technology integration teachers, and educators as well as school administrators. Addresses key aspects of learning such as critical thinking, inquiry, learning spaces, blended learning, engagement, motivation, and Common Core State Standards (CCSS).

"If you have a question about school librarians and online learning, try this resource. There is a lot to like in this book, whether you're a working librarian, a student preparing to be a librarian, a tech-savvy teacher, a school administrator, or an interested parent or school board member. . . . It also serves as a guidebook to help longtime professionals evaluate and improve their programs and offers new librarians a rich resource for what lies ahead. . . . Overall, this book can be a worthy addition to your collection to help you stay up-to-date with online learning in schools and especially in school libraries." - Marketing Library Services
